Register Now!

Ten Reasons to plan to attend HomeTown Health's 2021 Spring meeting:

1. It's been a year since face to face hospital colleagues networking has occurred (other than HomeTown's Fall Meeting)and that has cost the rural hospital community a lot of relationship loss. And this is what you told us you wanted!
2. There will be sixty HomeTown Business Partners that are fully vetted who are selected to improved you hospital's overall operations
3. Punch reset on relationships that have so far been hurt and lacking nurturing with the pandemic.
4. Sharing lessons learned from the pandemic with your hospital colleagues
5. Sharing what you have learned in identifying how to properly spend CARE's Act money to prevent Federal takeback in the future
6. See the future of rural health care through the eyes of Remote Patient monitoring and telemedicine and mobile medicine
7. Share how to evolve virus treatment protocols that drop patient lengths of stay down to 2-3 days from 8-12 days that in turn increases patient capacity
8. Share the notion of damage done to mental health from the pandemic and what treatments work to rebuild the person
9. Hear great speakers who love rural hospitals!
10. Be refreshed in the fresh ocean air!

This will be a safety protocol driven meeting just like the Fall Meeting at Callaway, i.e., Masks required throughout, personal temperatures monitored throughout, recent patient history identified relative to Covid-19, and social distancing.
