

# Georgia SHIP Grant 22-23 Program Breakout Sessions Wednesday, April 12, 2023 9:00am - 3:15pm

## Part I - Trauma Informed Care: Focus on Post-Acute Care Populations

Trauma-Informed Care (TIC) clinical programming and ongoing educational training was required for swing beds in October 2018, while the survey process for nursing homes (NFs) and SNFs was implemented in November of 2019. This session covers and Introduction to Trauma Informed Care: (TIC) and will emphasize physical and emotional safety for patients as well as providers through developed policies, programming, and ongoing training. In this session, the speaker will guide participants through interactive exploration of current key concerns of swing bed providers and provide expertise on implementation of evidence-based solutions.

9:00am - 9:10am	Welcome	Lauren Adair, Program Manager, HomeTown Health
9:10am - 12:30pm	Trauma Informed Care Session	Kerry Dunning, President, Kerry Dunning, LLC

#### 12:30pm- 1:15pm Lunch Break

## Part II - The Way, The Stay and The Pay Series Introduction

Implementing a strong case management and utilization management program to verify that patients are receiving the right care at the right time will ensure that hospitals are delivering appropriate, cost-efficient care. These programs are also an essential part of a provider organization's revenue cycle, helping to prevent unnecessary costs and claim denials. HomeTown is pleased to announce a new series "The Way, the Stay and The Pay" led by Becky Tarr of MedPerformance will provide needed guidance on assuring your programs are compliant and effective. In this session, Becky will cover the "why" of CM/UM focusing on the importance of strong processes to assure compliance and effective patient centered care management and coordination.

1:15pm - 2:15pm	The Way, The Stay and The Pay Series	Repecca Corzine Tarr, President and
		CEO, MedPerformance

### Part III - GA SHIP 2019-2023 Special Innovation Closing and Celebration

The HTH Hospital Innovation Consortium and related projects have supported the SHIP hospital project management teams with training in project management and various performance improvement models in order to seek measurable outcomes and impacts around a focus area related to Care Coordination from 2019 - present. Today's workshop will celebrate results and lessons learned - each participating hospital will present an overview of the program activities, education and training. The cohort coach panelists will identify opportunities in industry trends, emerging best practices and innovations within each care coordination focus area
