REAL TTIME

Rural Expanded Access to OUD Care and Linkage Using Toxicologists for Telehealth-Initiated TreatMEnt

ABOUT

REAL TTIME helps rural hospitals meet The Joint Commission standards by providing evidence-based opioid use disorder (OUD) care. This program ensures access to life-saving medication, streamlines care coordination, educates patients on treatment risks, and equips staff with essential MOUD and harm-reduction training. With REAL TTIME, rural hospitals can enhance patient outcomes, reduce opioid-related deaths, and strengthen community health.

The Joint Commission R3 for MOUD

GEORGIA POISON CENTER

Call GPC for assistance with:

- Acute opioid withdrawal management
- Initiation of Medication Assisted Therapy (Suboxone)
- Linkage to local Recovery Community Organizations for help with outpatient follow up

Expert Support:

- Four board-certified addiction medicine doctors staff the GPC that also practice clinically in the ED.

Poison Control can help control opioid withdrawal
