Microsoft

Rural Health Resiliency

SOLUTIONS for AI Innovation and Cybersecurity

Through the **Microsoft Rural Health Resiliency Program**, rural health organizations are driving AI and innovation, bolstering cybersecurity protection, saving money on Microsoft solutions and gaining essential skills.

Register here to participate in the program

1 in 3

Rural hospitals are actively participating in the Rural Health Resiliency Program.

470+

Independent CAHs, REHs and RCHs are saving 60–75% on common Microsoft products.

300+

Rural hospitals have adopted free AI tools to support denied claims management.

Microsoft is committed to supporting all rural hospitals in the US with

Affordable Access

- **Nonprofit pricing for independent CAHs, REHs and RCHs** on common business and security products.
- **Free Windows 10 Support Extension** through 10/13/26 that will support up to 250 devices running on final software version (22H2).

Capacity & Capability

- **Free Cybersecurity Assessment** to enhance cybersecurity capabilities.
- **Free Cloud & AI Readiness Assessment** to migrate tech and apps to the cloud safely and affordably.
- **Free curated Cyber & AI Training** for frontline staff.
- **Free** foundational **cyber certifications** for IT staff.

AI & Innovation

- **Dragon Copilot offer for rural hospitals** bringing free services and AI clinical assistant to streamline clinical documentation and improve healthcare workflows (available spring)
- **Free Claims Denial Navigator** tool helps recover lost revenue and streamline denied insurance claims microsoft/RHAIL-Claims-Denial-Navigator).

Rural Health Resiliency

SKILLING for AI Innovation and Cybersecurity

AI Skilling for Healthcare

AI Tools and Skills Development

- ✓ Using Copilot in Healthcare (aka.ms/HealthcareScenarios)
- ✓ Chart your course using AI Skills Navigator (aka.ms/RHRAISkillsNavigator)

Practical tools and learning resources to build AI skills and apply AI solutions in daily healthcare operations.

AI Strategy and Leadership

- ✓ AI for Leaders in Healthcare (aka.ms/DiscoverMSAIforLeaders)
- ✓ Define your AI Strategy to Create Healthcare Value (aka.ms/DefineMSAIStrategy)

Guidance and best practices for healthcare leaders to define, plan, and drive AI transformation.

Coming Soon: The **"AI Learning Path for Rural and Community Health"** – a 9-video series introducing AI fundamentals and governance for rural and community health settings.

Cybersecurity Skilling for Healthcare

Cybersecurity Basic Tools

- ✓ Enhance Cybersecurity for Everyone (https://aka.ms/Cybersecuritybasics)
- ✓ Earn your Free Career Essentials Certificate (aka.ms/career-essentials-in-cybersecurity)

Basics and beyond information to keep you vigilant for cybersecurity threats and attacks – at work and at home.

Microsoft Security and Compliance

- ✓ Microsoft Security Documentation (https://learn.microsoft.com/en-us/security/)
- ✓ Microsoft 365 Security and Compliance (https://learn.microsoft.com/en-us/training/paths/m365-security-compliance-capabilities/)

Comprehensive resources and best practices for securing healthcare data and ensuring regulatory compliance.
