Microsoft | Hometown Health University

AI LEARNING PATH

for Rural & Community Health

A Partnership Between Microsoft and Hometown Health

Microsoft and Hometown Health have partnered to deliver this practical video series on AI fundamentals, responsible adoption, and change leadership tailored for rural and community health teams.

Learn how to apply generative AI tools and Microsoft solutions to work efficiently and creatively, with safeguards in place.

Each video is ~25 min long and self-paced. You can take any—or all—in the order you prefer. We welcome feedback at RuralHealth@Microsoft.com

AI Learning Path Overview

Get familiar with the AI Learning Path content and how it can benefit you and your organization wherever you are in the AI journey.

AI Overview

AI has moved from hype to reality. This video explores the impact of AI on healthcare.

Responsible AI

Innovation is vital but must be approached thoughtfully. Learn how to implement and use AI responsibly in healthcare.

AI and Change Leadership

AI adoption is about human change, not just technology. Success depends on how well leaders manage both.

AI for Tech Leaders

For rural and community health technology leaders, AI presents significant opportunities and unique considerations. Learn what tech leaders need to know.

Generative AI and LLMs

Generative AI tools, including large language models, have accelerated AI adoption. Learn about LLMs and how to bring them into your workday and organizations.

Prompting

Everyone interacts with AI through prompting. Gain the basic skills to develop good prompts here.

Generative AI in Operations

AI can streamline repetitive tasks in daily operations. Learn how to use AI to free up staff time for high value work.

Generative AI for Projects, Quality, and Data

Learn how to facilitate and streamline project management, quality improvement, and data analysis using AI tools.

AI Agents

Agents are the wave of AI innovation. Learn about them and how they streamline processes here.

WHO IS THIS FOR?

- ☑ *Anyone* beginning their AI journey
- ☑ Hospital CEOs & administrators
- ☑ IT directors & health informatics staff
- ☑ Clinical & operations leaders
- ☑ Quality improvement professionals

WHAT YOU'LL GAIN

- ☑ Foundational understanding of AI in healthcare
- ☑ Practical skills for responsible AI adoption
- ☑ Change leadership strategies for AI transitions
- ☑ Hands-on prompting and generative AI techniques
- ☑ Microsoft-aligned AI agent development
